Dr. Alice Moran
Department of Animal Pathology
Kentucky Agricultural Expt. Sta.
University of Kentucky,
Lexington, Ky.

Dear Dr. Moran:

I would appreciate the favor if you could provide me with three or four strains of *Salmonella abortus-equi*. I have been reexamining the problem of phase variation in this species. Dr. Edwards' stock culture [which I brought back from a recent visit] seems to be rather rough, and Dr. Bruner has also suggested that I might refer to you for some assistance.

Thank you very much,
Sincerely,

Joshua Lederberg
Associate Professor of Genetics
